Dr. Harris,

If you feel that you need more paraprofessional support in your school, then you will need to contact Dr. Wright to request additional funding. Please keep in mind that additional paraprofessional support requests need to be made as an IEP team decision and that current staffing levels must be at capacity in order to support the decision for new personnel.

Sam

Sam,

I have a parent who is requesting a re-evaluation of her child's certification before the three-year mark and is requesting paraprofessional support for him. I don't know that he needs it – I've talked to his teachers, and he's doing fine, I think – but overall, I could use some more support. We are tight for people over here to meet all of our IEP service hours. Can I request some additional support or personnel to meet these needs?

Alisha
